Subject: The great sellout

Never in the history of American Justice has there been a greater fraud passed off as Justice. This resolution provides nothing for consumers, and does nothing to help reign in the behavior of one of the most voracious companies in history.

I am not sure how any one at the Justice Department sleeps at night. Microsoft lost at every step and in the end won due to a gutless DOJ decision to let them off with nothing more than a tap on the wrist...you should be ashamed.

I worked at USWest for 13 years...that was a real Consent Decree!

Michael
